

Dog Vaccination – User manual

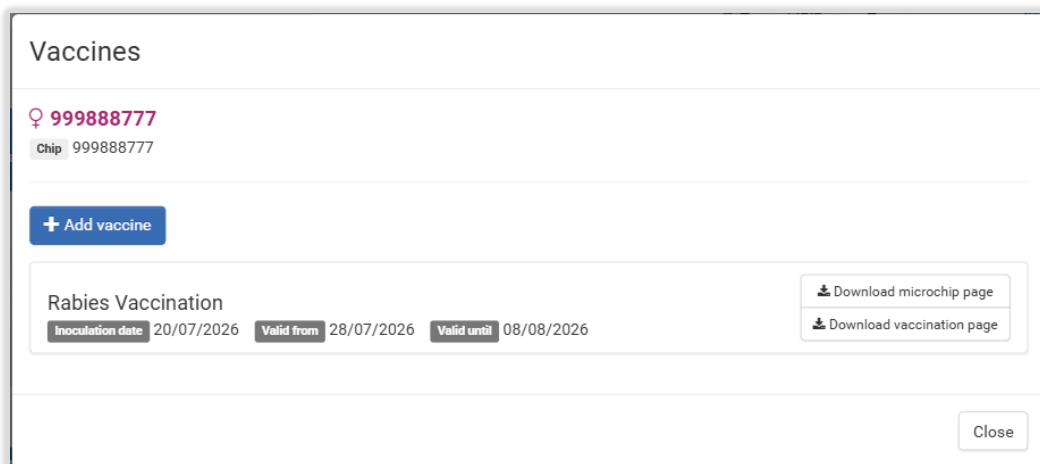

This guide explains where to upload your dogs' rabies vaccination records and how the vaccine verification process works during event registration.

Where to upload your dogs' vaccines

In the “My dogs” section, a button is available for each dog, allowing you to view and upload the subject's vaccines.

Pressing the button  opens the list of vaccines associated with the dog:

To upload a new vaccine, press the "+Add vaccine" button and the entry form will open:

Save

Enter the vaccination date and validity period (start/end), attach the corresponding copies of the passport, and clicks **Save**.

Once uploaded, vaccine data cannot be modified or deleted. Should it be necessary to modify data for an already uploaded vaccine, you must contact **Kinoloska Zveza Slovenije** directly: razstavekzs@kinoloska.si

Vaccine checks during entry

When registering for an event, the system verifies that all the dog's vaccinations are valid through the start date of the event. If this requirement is not met, you are notified that the dog's vaccinations are not up to date, but you can still complete the registration by clicking 'OK'.

Warning

Warning: at the show date the dog's vaccinations are not in order
